Ms. Olivia Wong
Enterprise Architecture Intern, TD Bank Group
66 Wellington Street West, 26th floor
Toronto Ontario
M5K 1A2

Dear Ms. Wong,

I am a dedicated third year student at Wilfrid Laurier University enrolled in the Honours Computer Science Program. As a Private Programming Tutor and as a Web Developer with technical expertise in Java and JavaScript, I believe I would be a great fit to succeed as an Application and API Architecture Developer at TD Bank Group.

As a third year student, my course work has equipped me with knowledge in Java and its data structures, Excel and macro development, and data architecture using SQL. As a Teaching Assistant, I actively solve students' problems by simplifying the problem and work with them in reaching the solution, which helped me develop my teaching and analytical skills. To develop my leadership skills, I have participated in 3 hackathon competitions in the past year including Canada's biggest hackathon, Hack the North at the University of Waterloo, where we won a prize for the best use of Sponsor API, in which our team placed 20th out of 1700 participants. In my spare time, I enjoy keeping up to date with new industry software such as IBM Watson, Pandas' Data Analytics, and Google Analytics.

As a Web Developer at Gide Analytics Inc, I took responsibility to work with Flask in Python for web deployment and JavaScript for data visualization development. In the startup company, I worked closely with back-end developers to develop the best customized data visualization chart for sentiment analysis with big data under the scrum agile development cycle. With only a time slot of 2 months for web development, I was able to complete my assignments and documentation with my time management skills. Before the end of my work term, I gave a presentation to the executive team about our accomplishments, research and analysis of alternatives, and our vision for the application's future, which helped solidify my presentation skills.

My enjoyment of watching the latest technology trends and my professional experience in multiple team environments will allow me to be an effective asset to your company. If you have any further questions, please contact me at any time. Thank you for considering my application as the Developer role at TD Bank Group.

Sincerely,

Yahya Thai
